Guangdong Sunkia Machinery Technology Co., Ltd.

## 关于鑫佳 / About Us

广东鑫佳机械科技有限公司是一家从事研发制造印刷纸品机械的中外合资、国家高新技术及科技版挂牌企业，自2009年成立以来，一直坚持以“优质、诚信、热情”的企业服务精神，不断发展壮大。赢得了广大用户的信赖和赞誉。

现阶段本公司主要产品已包括多功能开窗覆膜机、高速卷对卷覆膜机、高速厚薄UV上光机、快速上油压光机、全自动高速喷码机、精密高速纸箱数码印刷机、精装礼品盒生产设备等相关纸品机器。这批产品现今已立足于珠江角洲，同时也都挤身于欧洲及东南亚各地市场。但我们仍不以此为傲却将眼光放得更长远，相信不久的未来全世界任何角落都可看到与听到“鑫佳公司”的产品和好评。

公司自成立以来，业务发展迅速，本公司始终贯彻“品质第一，服务至上”的经营方针，聘请广大的机械设计及专业团队，可为客户随时量身定做各类印刷后加工的机械，不仅如此，鑫佳拥有长期累积的经验，将不断开发创新出更先进的优质产品和更完善的售后服务。

本公司还拥有一支精干的专业维修队伍，对本公司销售的产品进行跟踪服务。并在最短的时间内对客户提出的问题给予解决，尽力达到客户最满意的要求。请您相信“鑫佳产品”是您最可靠的合作者，并欢迎您光临敝司参观、指导或来电咨询。

## 企业荣誉 ENTERPRISE HONOR

客户的信任是我们的荣誉，我们致力于为用户提供全方位的服务。  
产品的质量是我们的生命，我们致力于完美品质的实现精益求精。  
The trust of our customers is our honor, we are committed to providing users with a full range of services.  
Product quality is our life, we are committed to make the quality to achieve excellence.

Guangdong Sunkia Machinery Technology Co., Ltd. is a sino-foreign joint venture as well as a national high-tech enterprise, science and technology edition listed company engaged in research, development and manufacture of the paper printing machinery and auxiliary equipment. We have been insisting on the principles of "Quality, Credibility, and Passion" since its establishment in 2003. Our business is growing continuously, and our quality plus service win us high appreciation from customers both at home and abroad.

At the present stage, the main products of the company include UV spot coater, four-head full-automatic UV coater, automatic flute laminator, powder remover, rapid calendering machine, automatic high-speed water-based film laminating machine, automatic high speed inkjet printer, precision high speed carton digital printing machine and some other widely used printing and packaging machinery. These products have already won their reputation in the Pearl River Delta area, and also are spreading into the market of Taiwan, Hongkong, Beijing, Shanghai, Guangdong and Southeast of Asia. Furthermore, we stay focus on the long term and believe that the products from Sunkia company will spread all over the world and get good comments. Since 2003, company business has developed rapidly. "Quality first, Service first" are the main principles and are implemented all the time. A large number of experienced engineers and technicians are employed to provide professional and satisfactory service for customers. Our mechanical designers and professional team can design and manufacture paper processing machines in different sizes and types. Furthermore, Sunkia is an experienced company and is continually going in for innovative machinery and constantly improving after-sale service. Sunkia has an excellent professional team for maintaining the sold-out products and solving the customers' problems in the short period of time to satisfy their requirements. Sunkia is the most reliable partner of you and we welcome your coming, guidance and inquiry.

## 企业文化 / Enterprise Culture

- 以人为本、和谐共赢是鑫佳机械企业文化的精髓
  - 追求品质、追求高效、追求创新是鑫佳机械企业力量不竭的源泉
  - 合作精神、团队意识、高效管理及强烈的事业心是鑫佳机械凝聚力
  - 品牌与效益是鑫佳机械企业管理的灵魂
- People-oriented, harmonious and win-win situations are the core value of the Sunkia machinery enterprise
- Pursuing efficiency, innovation and quality is the inexhaustable source of Sunkia Machinery Enterprise
- The cooperating spirit,teamwork, efficient management and a strong sense of enterprise are the team cohesion of Sunkia machinery
- Brand and efficiency are the soul of Sunkia mechanical enterprise management

## 发展历程/DEVELOPMENT HISTORY

2011年03月  
公司正式乔迁至东莞大岭山  
2011.05, Sunkia Machinery moved to Dalingshan Town, Dongguan City officially

成立鑫佳机械有限公司  
2009.05, Sunkia Machinery Co.,Ltd was established

公司被评为“国家高新技术企业”  
2016.12, Sunkia Machinery was awarded as "National High-tech Enterprise".

公司正式挂牌成为科技版企业  
2017.12, Sunkia Machinery was officially listed as a technology enterprise

公司再次被评为“国家高新技术企业”  
2019.05, Sunkia Machinery was rated as "National High-tech Enterprise" again.

公司获得了“一种多功能涂布上油机组”  
“一种覆膜连线涂布机”发明专利  
2021.02, Sunkia Machinery was awarded the invention patents of "a multifunctional coating and oil varnishing machine unit" and "a laminating and UV coating on line machine"  
2023年2月申请多项发明专利！  
公司并在台湾及马来西亚设立分公司  
February 2023 to apply for many items of invention patents! The company also has branches in Taiwan and Malaysia

2017年06月  
公司荣获了“卷筒纸覆膜机”  
“多功能开窗覆膜机”  
“多功能染色触感上光涂布机”  
等多项发明专利  
2017.07, Sunkia machinery was awarded as multiple invention patents, including the roll-to-roll film lamination machine and multifunctional window laminating machine, multifunctional dyeing and soft touch UV varnishing machine.

2018年08月  
公司分别在印尼和越南设立跨国分公司  
2018.08, Sunkia Machinery set international branch both in Indonesia and Vietnam.

2020年05月  
公司获得了“一种全自动覆膜机伺服控制系统”发明专利  
2020.05, Sunkia Machinery was awarded the invention patent of "an automatic laminating machine servo control system"

2021年04月  
公司乔迁新智能智造工厂，  
扩大生产规模，并增资正式升为  
“广东鑫佳机械科技有限公司”  
2021.04, Sunkia Machinery moved to the new Intelligent Manufacturing Factory, expanded the production scale, and increased capital officially upgraded to "Guangdong Sunkia Machinery Technology Co., Ltd."

## 全自动高速多功能开窗覆膜机（即涂胶水膜/预涂膜）

Automatic High-Speed Multifunctional Window Laminating Machine (Wipe-on glue /Thermal Film)

### 功能说明 Characteristics

- 此为高速开窗多功能覆膜机，此为国内首创，为广大客户解决了开窗后覆膜的特殊工艺，大大提高了产品外观美及成本的节约。采用贴合轮加热加压方式将薄膜贴合于已上胶表面。
- 电磁加热：热能利用率达95%，升温加快2倍。
- 伺服传动系统控制纸张搭位系统，使纸张搭位更稳定、高效、精准。
- 热能回收系统，有效减少热量损失，更加节能环保，提高效率25%。
- 链刀型覆膜机：链刀式切纸机构，专门针对薄纸、PET、PVC、薄膜分切机，适用于各种不同的薄膜。
- This is a multifunctional window laminating machine, by heating and pressing the laminating steel roller to laminate the film on the glued paper. Good lamination effect can be reached and the cost is reduced.
- Thermal energy utilization reaches 95%, and the heating rate is doubled.
- Servo drive system controls the paper overlap system, making paper overlap more stable, efficient and accurate.
- Heat recycling system, effectively reduce heat loss, more energy saving and environmental protection, improve efficiency by 25%.
- Flying-knife laminating machine: Flying-knife cutter system is specialized in thin paper, PET, PVC, thin film, it is available for all kinds of film.

### 产品配置 Configuration

				
<b>飞达送纸系统 / Paper Feeder</b> 采用伺服无轴传动，四吸四送高速飞达头，针对各款厚薄纸使用。 Adopt servo shaftless drive,High-speed feeder heads with four-suction, four-feed structure, available for both thin and thick paper.	<b>高精密伺服传动控制纸张搭位系统</b> High precision servo-drive will control the paper overlap system	<b>除粉系统 / Dust Remover</b> 静电除粉可去除纸张表面90%以上粉尘。 Electrostatic powder cleaner can remove more than 90% of dust from paper surface.	<b>窗口产品上胶系统 / Gluing system for window lamination products</b> 适用于油水两用、涂胶均匀、水除粉适用 It is available for both water-based glue and oily glue, also the glue can be averagely coated.	<b>红外线烘干系统 / IR drying system</b> 可选择半功全功方式加热 Two options : Half-power heating OR full-power heating.
				
<b>电磁感应加热系统 / Electromagnetic heating system</b> 热能损耗低、利用率高、加热快，节能20% Low heat loss, high utilization, fast heating, 20% energy saving	<b>链刀分切系统 / Flying-Knife Cutter</b> 此机构专门针对薄纸、PET、PVC、薄膜分切，适用于各种不同的薄膜。 Flying-knife cutter specialized in thin paper, PET,PVC, thin film, it is available for all kinds of film.	<b>拉断系统 / Snapping System</b> 新式切纸系统，采用下吸风轮送平台，针对薄纸运行更加稳定，且纸张尺寸调整简便。 Snapping roller system suitable for different sizes of the sheet, and it is more stable for thin paper cutting with easy adjustment.	<b>收纸系统 / Paper delivery system</b> 气动拍纸结构，自动排废系统，高速生产时亦可整齐收纸，可选择拍纸张数。 Pneumatic jogging system, waste discharge system, paper can be neatly collected even under high speed production	<b>人机界面 / Human Machine Interface</b> 人性化设计、可旋转式操作 Humanized design, rotatable operation
				<b>CE标准独立电箱 / Electric box in CE standard</b> 进口电子元件、电路采用PLC控制 Imported electrical components, PLC control system for circuit

### 机械规格 Specification

型号	Model	XJFMKC-1050	XJFMKC-1200	XJFMKC-1200L	XJFMKC-1200XL
速度	Speed (M/min)	0-75	0-75	0-70	0-70
纸张基本范围	Paper Thickness (g/m <sup>2</sup> )	100-500	100-500	100-500	100-500
开窗涂布纸张基本范围	Weight of coated paper (g/m <sup>2</sup> )	250-500	250-500	250-500	250-500
最大用纸尺寸	Max.Sheet Size (W*L)mm	1050*900	1180*1200	1200*1450	1200*1650
最小使用尺寸	Min.Sheet Size (W*L)mm	300*300	300*300	300*300	350*350
用电需求	Power Requirement (KW)	58	60	65	70
生产用电	Production Power (KW)	38	45	50	55
机器尺寸	Dimension (L*W*H)mm	12900*3450*2800	13500*3800*2800	13900*3800*2800	14300*3800*2800
机器重量	Machine Weight (KG)	10800	11300	12000	13800

## 全自动高速多功能上油涂布·开窗覆膜机 替塑油/水性光油/吸塑油

Automatic multifunction coating . window laminating Machine  
 Oil instead of plastic/Water based varnishing/Blister oil

### 功能说明 Characteristics

- 此为高速开窗多功能覆膜机，此为国内首创，为广大客户解决了开窗后覆膜的特殊工艺，大大提高了产品外观美及成本的节约。采用贴合轮加热加压方式将薄膜贴合于已上胶表面。
- 电磁加热：热能利用率达95%，升温加快2倍。
- 伺服传动系统控制纸张搭位系统，使纸张搭位更稳定、高效、精准。
- 热能回收系统，有效减少热量损失，更加节能环保，提高效率25%。
- 链刀型覆膜机：链刀式切纸机构，专门针对薄纸、PET、PVC、薄膜分切机，适用于各种不同的薄膜。
- This is a multifunctional window laminating machine, by heating and pressing the laminating steel roller to laminate the film on the glued paper. Good lamination effect can be reached and the cost is reduced.
- Thermal energy utilization reaches 95%, and the heating rate is doubled.
- Servo drive system controls the paper overlap system, making paper overlap more stable, efficient and accurate.
- Heat recycling system, effectively reduce heat loss, more energy saving and environmental protection, improve efficiency by 25%.
- Flying-knife laminating machine: Flying-knife cutter system is specialized in thin paper, PET, PVC, thin film, it is available for all kinds of film.

### 产品配置 Configuration

#### 飞达送纸系统 / Paper Feeder

采用伺服无轴传动，四吸四送高速飞达头，针对各款厚薄纸使用。  
 Adopt servo shaftless drive, High-speed feeder heads with four-suction, four-feed structure, available for both thin and thick paper.

#### 高精密伺服传动控制纸张搭位系统 / High precision servo-drive will control the paper overlap system

静电除粉可去除纸张表面90%以上粉尘。  
 Electrostatic powder cleaner can remove more than 90% of dust from paper surface.

#### 除粉系统 / Dust Remover

适用于水油两用、涂胶均匀、水除粉适用。  
 It is available for both water-based glue and oily glue, also the glue can be averagely coated.

#### 窗口产品上胶系统 / Gluing system for window lamination products

红外线烘干系统 / IR drying system  
 可选择半功全功方式加热。  
 Two options : Half-power heating OR full-power heating.

#### 红外线烘干系统 / IR drying system

高精度激光雕刻陶瓷辊及刮刀系统，保证上胶更薄更均匀平整。  
 Ceramic roller work with blade system to control the glue thickness and glue consumption.

#### 电磁感应加热系统 / Electromagnetic heating system

此机构专门针对薄纸、PET、PVC、薄膜分切，适用于各种不同的薄膜。  
 Flying-knife cutter specialized in thin paper, PET, PVC, thin film, it is available for all kinds of film.

#### 链刀分切系统 / Flying-Knife Cutter

拉断系统 / Snapping System  
 新式切纸系统，采用下吸风轮送平台，针对薄纸运行更加稳定，且纸张尺寸调整简便。  
 Snapping roller system suitable for different sizes of the sheet, and it is more stable for thin paper cutting with easy adjustment.

#### 拉断系统 / Snapping System

收纸系统 / Paper delivery system  
 气动拍纸结构，自动排废系统，高速生产时亦可整齐收纸，可选择拍纸张数。  
 Pneumatic jogging system, waste discharge system, paper can be neatly collected even under high speed production.

#### 收纸系统 / Paper delivery system

人机界面 / Human Machine Interface  
 人性化设计、可旋转式操作。  
 Humanized design, rotatable operation

#### 人机界面 / Human Machine Interface

CE标准独立电箱 / Electric box in CE standard  
 进口电子元件、电路采用PLC控制。  
 Imported electrical components, PLC control system for circuit

## 高速智能覆膜连线涂布机

High speed and Intelligent laminating machine + coating on line machine

### 功能说明 Characteristics

- 全球首创! 专为客户设计和定制的覆膜连线机型，帮客户提供生产效率，大幅节约成本。贴合在纸张后，经过纸张分割系统，再经过涂布系统，在膜的表层涂布防刮哑UV油、触感油、清漆油等，再经紫外线或红外线烘干后即可变成高端防刮膜、触感膜及UV印刷用金属卡纸，大幅度降低了生产材料成本，纸张表面再进行下一道工序丝印UV及烫金、烫银，附着力效果会更好。
- 鑫佳此技术已申请独家专利，并已通过CE认证，远销世界各国，且深受广大客户欢迎。
- 适用于：高端防刮膜、触感膜及UV印刷用金属卡纸，能广泛用于高端精美礼品盒、化妆品盒、手机盒、手提袋、高精密电子产品及昂贵的电器产品等表面覆膜处理工艺。
- 该设备同时可以用于替塑油、高端哑油等涂布，可实现既可覆膜又可上油的一机二用。
- Sunkia is the first company to design and customized this automatic lamination + in line coating machine for customer to help customer save cost and improve production compacity. this kinds of in line design can make high-end anti-scratch, soft touch, and primer coating . can reduce the cost of the production materials, and paper surface with better adhesive force after before go into next production process like silk screen printing, hot stamping.
- Sunkia has applied for the exclusive patent of this technology, and has passed the CE certification, exported to the many countries. Customers are very satisfied and welcome this machine.
- Available for: high-end anti-scratch film, soft touch film and UV printing with metalized film paper. Widely used in high-end gift box, set box, cosmetic packaging box, phone box , hand bag and other luxury box+ coating processing technology.
- This machine is available for both high-end de-plastination oil and high-end matte varnishing oil coating, and achieve two surface finish( laminating+varnishing) in one machine.

### 产品配置 Configuration

					
飞达送纸系统 / Paper Feeder 采用伺服无轴传动，四吸四送高速飞达头，针对各款厚薄纸使用。 Adopt servo shaftless drive,High-speed feeder heads with four-suction, four-feed structure, available for both thin and thick paper.	高精密伺服传动控制纸张搭位系统 High precision servo-drive will control the paper overlap system	除粉系统 / Dust Remover 静电除粉可去除纸张表面90%以上粉尘。Electrostatic powder cleaner can remove more than 90% of dust from paper surface.	多功能涂布系统 / Multi-functional coating system 适用于防刮哑油、触感油、染色油、替塑油、金银卡纸清油涂布。 Available for Anti-scratch matte finish ,soft touch finish, Dyeing, De-plastination, Primer on metallized paper.	红外线/紫外线烘干系统 / IR/UV drying system 可选择半功全功方式加热 Two options : Half-power heating OR full-power heating.	涂布系统 / Coating System 高精度激光雕刻陶瓷辊及刮刀系统，保证上胶更薄更均匀平整。 Ceramic roller work with blade system to control the glue thickness and glue consumption.
					
电磁感应加热系统 / Electromagnetic heating system 热能损耗低、利用率高、加热快，节能20% Low heat loss, high utilization, fast heating, 20% energy saving	链刀分切系统 / Flying-Knife Cutter 此机构专门针对薄纸、PET、PVC、薄膜分切，适用于各种不同的薄膜。 Flying-knife cutter specialized in thin paper, PET,PVC, thin film, it is available for all kinds of film.	拉断系统 / Snapping System 新式切纸系统，采用下吸风轮送平台，针对薄纸运行更加稳定，且纸张尺寸调整简便。 Snapping roller system suitable for different sizes of the sheet, and it is more stable for thin paper cutting with easy adjustment.	收纸系统 / Paper delivery system 气动拍纸结构，自动排废系统，高速生产时亦可整齐收纸，可选择拍纸张数。 Pneumatic jogging system, waste discharge system, paper can be neatly collected even under high speed production	人机界面 / Human Machine Interface 人性化设计、可旋转式操作 Humanized design, rotatable operation	CE标准独立电箱 / Electric box in CE standard 进口电子元件、电路采用PLC控制 Imported electrical components, PLC control system for circuit

## 水性、预涂膜、无胶膜多用机型

Multi-purpose Models For Water-based  
Pre-coating, And Thermal Film

随意组合/选配 Free combination/Optional

### 1. 双面覆膜 Double-sided laminating

### 2. 除粉系统 Powder removal system

清除纸张表面粉尘，增强纸张覆膜亮度和贴合度。

### 3. 双压合系统 Double pressing system

防爆膜能力x2。

### 4. 压纹系统 Embossing system

各式压纹体现独特覆膜美学。

### 5. 热刀系统 Hot knife system

### 6. 链刀分切 Chain knife slitting

适实现对PET、铝箔膜等高韧性膜的分切，分切精准无尾膜。

### 7. 喷码系统 Coding system

### 8. 电晕装置 Corona device

### 9. 除静电棒 In addition to static bar

### 10. 双膜装置 Double membrane device

### 11. 连线涂布 Coating on line machine

### 12. 转移膜复卷装置 Transfer film from paper system

### 1. Double-sided laminating

### 2. Powder removal system

Remove dust on the surface of the paper, and enhance the brightness and adhesion of the paper coating.

### 3. Double pressing system

Explosion-proof film capacity x2.

### 4. Embossing system

Various embossing embossing unique film aesthetics.

### 5. Hot knife system

### 6. Chain knife slitting

It is suitable for slitting high-toughness films such as PET and aluminumfoil film, with precise slitting and no tail film.

## 全自动卷对卷覆膜机

Automatic Roll To Roll Laminating Machine

重量	Machine Weight	4.0T	4.2T	4.8T	5.5T	6.5T

### 功能说明 Characteristics

#### 基本结构 Standard equipments:

- 1、自动放卷系统：配有张力控制器，高效稳定无冲击
  - 2、纠边系统：具有自动检测，自动跟踪，自动调整等功能。
  - 3、贴合主机：集涂布油头/干燥系统/贴合主机于一体.直式型排列结构，机身结构轻巧紧凑。压力滚筒表面覆有坚硬之特殊橡胶表层。
  - 3.1干燥设备：特殊强力热风回收循环干燥系统及自动温度控制，得使水性胶水较快干燥，反应速度快，节能省电。
  - 3.2涂布油头：涂布滚筒由一支陶瓷计量辊独立组成，停机单独运转以节省清洁时间，速度可随连机快慢而变化，陶瓷滚筒效果佳，涂布均匀。
  - 4、收卷系统 配有控制器，始终保持料边与卷轴垂直，最终使收料卷整齐。
1. Automatic unwinding system: equipped with tension controller, high efficiency and stability without impact
  2. Correction system; with automatic detection, automatic tracking, automatic adjustment and other functions
  3. Set coating oil head/drying system/lamination host in one body. Straight arrangement structure, light and compact fuselage structure. The pressure roller surface is covered with a hard special rubber surface
  4. Drying unit: Special strong hot air recycling cycle drying system and automatic temperature control, so that the water-based glue can get faster dried with higher reaction speed, being energy saving also.
  5. The coating drum is composed of a ceramic metering roller. It can be stopped separately to save cleaning time. The speed can be changed with the speed of the machine. The ceramic drum has good effect and uniform coating
  6. The winding system is equipped with a controller, which always keeps the material edge and the reel vertical, and finally makes the receiving coils neatly

 UV干燥系统  
 自动收纸机  
 自动控制

半程牙排输送  
 可选配置  
 送纸收纸不停机装置  
 预叠小车装置  
 陶瓷网纹辊配置

## 产品配置 Configuration

**飞达送纸系统 / Paper Feeder**  
 采用伺服无轴传动，四吸四送高速飞达头，针对各款厚薄纸使用。

**供油部 / Varnish Supply**  
 采用钢滚胶辊相组合，计量辊反转加刮刀结构，可控制油量大小满足产品要求。操作简单方便。(陶瓷辊根据线数确定油量)

**放纸部 / Sheet Putting**  
 采用凸轮和吹风共同完成，使纸张平稳顺利地释放到轮送带上，保证送纸顺畅。

**红外线/紫外线烘干系统 / IR drying system**  
 可选择半功全功方式加热  
 Two options : Half-power heating OR full-power heating.

当纸张到达前归时，设有左右拉归选用，当纸张缺少时，通过感应器可立即停止送纸同时退压，使底辊保持无油状态。

Steel roller and rubber roller with metering roller reversing and scraper structure control varnish consumption and volume to meet the demand of products and operate easily. (Varnish consumption and volume are determined by the line qty of ceramic anilox roller)

Sheet putting is achieved by cam and air blowing together to guarantee sheet is smoothly put on the conveying belt.

**电子智能UV光源 / Electronic intelligent UV**  
 采用最新电子智能UV光源点灯方式快捷安全，较传统UV功率节能35%。

**轮送部 / Conveying Unit**  
 采用上下轮送带，做薄纸时可将纸张成型为瓦形状，以便于收纸整齐。

**收纸部 / Sheet Delivery**  
 上下轮送带，做薄纸时可将纸张成型为瓦形状，以便于收纸整齐。

**人机界面 / Human Machine Interface**  
 人性化智能操作设计  
 Humanized intelligent operation design.

Using the latest electronic intelligent UV light source to make the light on more fast and safe, compared with the traditional UV power saving 35% power.

Upper and lower conveying belt can form thin sheet to be curved for neat and smooth delivery.

Pneumatic control through the electric eye count automatic paper align, automatic drop, so that the delivery is very smooth. The rear gear is electronically controlled, allowing samples to be easily, quickly and safely taken out during product inspection.

## 机械规格 Specification

型 号	Model	XJU-1040	XJU-1450	XJU-1650

# 全自动高速智能双头UV上光机 防刮哑油、触感、替塑、染色

## Fully Automatic High Speed Double coating head UV Varnishing Machine

(multifunctional type) Anti-scratch oil, soft touch oil, matte varnishing oil, De-plastination oil, Dyeing oil

### 功能说明 Characteristics

- 全自动快速机型配合单色调整系统，最高速度中达每分钟90米，使产能大幅提升。
- XJB机型在UV上光系统中加装风刀系统使机器可轻松的对薄纸进行UV上光。(另可在底油上光系统中加购风刀系统)
- 双除粉系统可确保纸张上光前的表面清洁，进以提高上光质量。
- UV固化干燥系统之UV灯管备有全开及半开模式，遇紧急状况UV灯座可使用气压升降，安全性可提高并减少损失。
- Fully automatic fast model with a single-color adjustment system, with a maximum speed of 90 meters per minute, enabling a significant increase in production capacity.
- The XJB model is equipped with an air knife system in the UV coating system so that the machine can easily UV polish thin paper. (Another air knife system can be purchased in the base oil coating system)
- Dual powder removing system can ensure the cleanliness of paper surface before varnishing , to improve the quality of varnishing.
- The UV lamp of UV curing & drying system has two modes:fully-lighting and semi-lighting states,which can extend the service life of UV lamp.The UV lamp holder can be moved up and down by air pressure system at emergency to ensure the safety and to reduce the loss.

### 产品配置 Configuration

#### 飞达送纸系统 / Paper Feeder

采用伺服无轴传动，四吸四送高速飞达头，针对各款厚薄纸使用。  
Adopt servo shaftless drive.High-speed feeder heads with four-suction, four-feed structure, available for both thin and thick paper.

#### 水式除粉系统 / Water-based powder removal system

利用水式循环方式将纸面粉尘清除，确保上光质量。  
Use Water circulation to remove dust on paper surface to ensure the varnishing quality.

#### 底油涂布系统 / Base oil coating system

适用于水性光油、吸塑油、磨光油等涂布。  
It is available for both water-based glue and oily glue, blister varnishing, also the water-based calendering .

#### UV面油涂布系统 / UV surface coating

UV上光系统采用陶瓷轮正反转来控制油量厚薄，避免挤压胶轮且上油较均匀。  
UV varnishing system adopts reversal Anilox roller to control the oil thickness to ensure smooth coating, instead squeezing the rubber roller.

#### 收纸系统 / Paper delivery system

气动拍纸结构，自动排废系统，高速生产时亦可整齐收纸，可选择拍纸张数。  
Pneumatic jogging system, waste discharge system, paper can be neatly collected even under high speed production

#### 多功能涂布系统 / Multi-functional coating system

适用于防刮哑油、触感油、染色油、替塑油、金银卡纸清油涂布。  
Available for Anti-scratch matte finish ,soft touch finish, Dyeing, De-plastination, Primer on metallized paper.

#### 人机界面 / Human Machine Interface

人性化智能操作设计  
humanized intelligent operation design.

#### 红外线/紫外线烘干系统 / IR/UV drying system

可选择半功全功方式加热  
Two options : Half-power heating OR full-power heating.

#### 收纸系统 / Paper delivery system

气动拍纸结构，自动排废系统，高速生产时亦可整齐收纸，可选择拍纸张数。  
Pneumatic jogging system, waste discharge system, paper can be neatly collected even under high speed production

# 全自動快速上油压光机(连线一条龙)

Automatic High Speed Varnishing and Calendering Machine

## 功能说明 Characteristics

- ◆ 本机采用水式除粉装置，可将印刷油墨上的粉尘清除，提高生产品质，过油机头采用高性能弹性耐用胶轮，精密单调油刀-清洗简易不伤油轮，促使长期使用永保纸张背面清洁。
- ◆ 加热轮打破传统采用高温熔接加厚特殊加工-适用于瓦斯、蒸气、电热而不变质，能使产品水准及工作效率提高。
- ◆ 轮送钢板接板停止电眼，采用进口特殊长距离电眼，避免电眼受到高温照射，提高使用寿命。
- ◆ 收纸采用三面齐纸，风压回路-低噪音、故障率低、纸张更换容易，运转中可随意抽样，是一部荣获多种新型专利的新产品。
- ◆ This machine adopts the water type powder removing device, which can remove the dust on the printing ink and improve the production quality. The oil delivery head adopts the high performance elastic and durable rubber wheel, the precision monotonous oil knife - the cleaning is easy without hurting the oil tanker. The knife can also be made use for long period of times. Moreover, the cleanliness of the back paper can always be maintained.
- ◆ The heating wheel breaks the tradition and uses high temperature welding to thicken the special processing - suitable for gas, steam, electric heat without deterioration, which can improve the product level and work efficiency.
- ◆ The electric eye for stopping on the conveying steel plate , uses the imported special long-distance electric eye, to avoid the electric eye from being exposed to high temperature, and increase the service life.
- ◆ The paper delivery adopts three-side paper alignment, wind pressure circuit - low noise, low failure rate, easy paper replacement, free sampling during operation, is a new product that has won a variety of new patents.

重量	Machine weight(kg)	10000	11600	12000

## 产品配置 Configuration

**加热系统 / Heating System**  
 采用最新德国电磁感应加热器，较传统加热方式节能40%，加热快散热也快。  
 Adopts new German electromagnetic induction heater, increasing temperature more faster and saving power by 40%, Cooling is more faster.

**压合系统 / Pressing system**  
 采用大直径钢轮与进口胶轮高温高压快速压合，生产速度每分钟可达90m。  
 Use bigger diameter steel roller and imported rubber roller to press rapidly. Production speed up to 90meters.

**探测系统 / Detection system**  
 采用进口高精探测感应仪，当压光钢带焊接口处运转至主机时，送纸飞达将停止送纸，从而很精准的避开纸张在压光接口处压坏。  
 Adopts the imported high precision detection sensor, when the steel belt runs to the welding part, the paper feeder will stop feeding. Thus, the paper is precisely avoided from being crushed at the laminating interface.

**钢带调节系统 / Stainless steel adjust system**  
 采用智能电动方式，控制大胶轮将压光钢带在运转中能准确左右前后调整。  
 Adopt the intelligent electric mode, control the big rubber roller to adjust the calendering steel belt accurately in operation.

**人机界面 / Human Machine Interface**  
 人性化智能操作设计  
 Humanized design, rotatable operation

## >> 全自动快速压光机

Automatic High-speed Calendering Machine

### 功能说明 Characteristics

- ◆ 送纸采用最新型送纸机-效率高：真空邦浦吸纸-稳定噪音小：单盘铁板纸台-板车推送节省人力和叠纸时间提高工作效率：惠达可掀式输送道-保养清洗空间宽阔方便。
- ◆ 加热轮打破传统采用高温熔接加厚特殊加工-适用于瓦斯、蒸气、电热而不变质，能使产品水准及工作效率提高。
- ◆ 输送钢板接板停止电眼，采用进口特殊长距离电眼，避免电眼受到高温照射，提高使用寿命。
- ◆ 收纸采用三面齐纸，风压迴路-低噪音、故障率低、纸张更换容易简便，运转中可随意抽样，是一部荣获多种新型专利的新产品。
- ◆ Paper feed adopts the latest type paper feeder - high efficiency; vacuum suction paper - stable, low noise; single tray iron plate paper - push cart saves manpower and paper stacking time, work efficiency improved; lift-type conveyor - the maintenance and cleaning space is wide and convenient.
- ◆ The heating wheel breaks the tradition and uses high temperature welding to thicken the special processing - suitable for gas, steam, electric heat without deterioration, which can improve the product level and work efficiency.
- ◆ The electric eye for stopping on the conveying steel plate , uses the imported special long-distance electric eye, to avoid the electric eye from being exposed to high temperature, and increase the service life.
- ◆ The paper delivery adopts three-side paper alignment, wind pressure circuit - low noise, low failure rate, easy paper replacement, free sampling during operation, is a new product that has won a variety of new patents.
